

Durable one is a metal based sign. Normally aluminium but mild steel can be used if specified

For all post mounted signs the thickness of Aluminium is 3mm with channel fitted as required by way of bolloff mechanical fixings.

Wall mounted signs are also in 3mm Aluminium with a minimum of four 6mm holes. Panel for frame fitting can be supplied with no holes or mounting rails

All signs have radius corners unless otherwise requested. Soft edges are a standard feature, hence no personal damage should the public come into contact with the sign.

The background color is powder coated with 100% coverage. The graphics are produced from minimum seven year vinyl.

The durable one vandal resistant finish is produced with specialist product which covers 100% of the sign. This is guaranteed uv resistant with no fade or colour change. Bs3900 applies

The vandal resistance is obtained by the creation of a barrier between the graphics and the sign reader. This barrier is to enable the integrity of the sign to be unaffected by vandal attack. Keys, coins etc. No colour fade or bleed, resistant to frost, wind and water damage, blown sand and air carried chemicals, . Easy to clean after attack by graffiti or indelible markers.

Guarantee – if, for whatever reason, the integrity of a durable one sign is affected, then the sign will be either repaired or replaced free of charge for a period of five years from purchase. Blatant destruction will not be covered in this guarantee

Signs with vinyl or printed graphics. Have an additional guarantee against fade – this guarantee is for ten years and covers the graphics against fade due to Uv or weathering

Returns policy. Any signs returned to us will be examined against our test results and purchase order, subject to failure they will be replaced free of charge and return carriage cost reimbursed. Signs not found to be defective will not be replaced and carriage for the return to sender will be charged.
